## ***IRRIGATION CANALS***

---

Irrigation canals are essential for conveying water from a lake, river or stream to irrigate land for agricultural or landscaping purposes.

Irrigation canal rehabilitation involves excavation and compaction of materials during the winter months, which provide specific challenges. MPE developed the design expertise and specifications to deal with these harsh climatic conditions.

MPE offers full, in-house services throughout the entire design process.

Our services include the following:

- ◆ Project Scoping
- ◆ Assessment Studies
- ◆ Geotechnical Evaluations
- ◆ Complete Survey and Aerial Drone Services
- ◆ Preliminary and Final Design
- ◆ Project Management
- ◆ Construction Management
- ◆ Commissioning Management
- ◆ Operations and Technical Training
