## ***IRRIGATION PIPELINES***

Irrigation pipelines are essential not only for agricultural-based uses and ensuring the availability of drinking water, but also for the livestock industry, industrial uses, wildlife habitat and recreational purposes.

MPE has been an industry leader for over 35 years in designing large diameter irrigation pipelines to replace surface, earthen canals. We designed the first system in Canada that utilized 1050 mm and 1200 mm PVC pipe.

MPE offers complete, in-house services throughout the entire design process.

Our services include the following:

- ◆ Project Scoping
- ◆ Assessment Studies
- ◆ Geotechnical Evaluations
- ◆ Preliminary and Final Design
- ◆ Complete Survey and Aerial Drone Services
- ◆ Project Management
- ◆ Construction Management
- ◆ Commissioning Management
- ◆ Operations and Technical Training
